

Isolation of skeletal muscle-derived mononuclear cells

 So-ichiro Fukada

Updated date: Dec 3, 2019

 An abbreviated version of this protocol was published in eLIFE in Sep 2019

Sustained expression of HeyL is critical for the proliferation of muscle stem cells in overloaded muscle

DOI: [10.7554/eLife.48284](https://doi.org/10.7554/eLife.48284)
